

Truck iQ™ SMART BATTERY DASHBOARD

- Protect assets and productivity
- Reduce unplanned downtime
- Cut Total Cost of Ownership (TCO)
- Optimize battery fleet operations

The Truck iQ™ smart battery dashboard features a lift truck-mounted display module that gives drivers a live view of key battery operating conditions. Truck iQ reads data via Bluetooth from the Wi-iQ® battery monitoring device on the battery to display a range of alerts, alarms and more to help optimize battery operation.

By providing real-time battery information in an accessible, easy-to-read format, Truck iQ gives operators the tools to help their operation avoid the costly unplanned downtime caused by premature battery failures.

POWER MANAGEMENT IN THE DRIVER'S SEAT

By wirelessly communicating with the Wi-iQ® battery monitoring device, the Controller Area Network (CAN)-enabled Truck iQ™ plays a frontline role in the transformation of battery data into actionable intelligence. Along with our E Connect smart device app, EnerSys® chargers, and our Xinx™ battery operations management system, the Truck iQ smart battery dashboard supports higher reliability and longer battery life.

Only compatible with Wi-iQ3 or Wi-iQ4 device

BATTERY INTELLIGENCE ON DISPLAY

Truck iQ features a 4.3-inch (109.22 mm) touchscreen mounted on the vehicle dashboard for easy viewing and access. The display screen starts up automatically on vehicle power-up, and notifies the driver via alarms and alerts as necessary. Without having to stop the truck, drivers can review a range of essential battery operating data, including:

- Remaining work time
- State of Charge (SOC)
- Temperature
- Electrolyte levels

| Part No. | Description |
|--------------|-------------------------|
| 6LA20723-PN1 | Truck iQ Dashboard |
| 6LA20738 | Mounting Bracket |
| 6LA20737-L2 | Power supply cable - 2m |
| 6LA20737-L4 | Power supply cable - 4m |

applicable to flooded lead acid batteries
